

Dottorato di Ricerca in
GENETICA, BIOLOGIA MOLECOLARE E CELLULARE
Techniques of immunocytochemistry, optical and electron microscopy
February 15- 17, 2021

Date	Hour	Topic	Teacher	
February 15	9.30 – 11.15	Light microscopy: bright field, phase contrast, DIC	Vittorio Bertone	Theoretical
February 15	11.30 – 13.00	Electron microscopy	Marco Biggiogera	Theoretical
February 16	9.30 – 12.00	Fluorescence microscopy Live cell imaging	Patrizia Vaghi e Amanda Oldani	Theoretical
February 16	14.30 – 17.00	Confocal microscopy Super resolution microscopy	Patrizia Vaghi e Amanda Oldani	Theoretical
February 17	9.30 – 11.30	Flow cytometry: theory and practice	Giuliano Mazzini	Theoretical and practical
